ABOUT ME

Dedicated cybersecurity professional with hands-on training in ethical hacking and security engineering. Recent completion of a comprehensive cybersecurity apprenticeship covering network security, penetration testing, vulnerability assessment, and threat analysis, complemented by a full-stack software development background. Committed to continuous learning and staying ahead of emerging cyber threats, with a goal of applying technical and analytical skills to help protect organizations and their assets from sophisticated attacks.

EXPERIENCE

Ethical Hacker — Apprenticeship | *CyberShujaa*

September 2025 – December 2025

- Planned and scoped penetration testing assessments
- Conducted information gathering and vulnerability assessment
- Exploited application-based vulnerabilities across web targets
- Exploited wired and wireless network weaknesses
- Assessed cloud, mobile, and IoT security
- Performed post-exploitation techniques
- Produced assessment reports and documentation
- Used security tools and performed code analysis
- Wrote scripts to support testing workflows

Full-Stack Software Development Apprenticeship | *Systech Limited Africa*

- Built and supported features using React, Java, and the Spring Boot framework
- Worked across the stack on application functionality within a live development environment

Cybersecurity & CTF Player — Online Trainee | *CyberTalents*

April 2024 – May 2024

- Practiced offensive and defensive techniques using Kali Linux
- Completed hands-on labs across multiple security domains
- Focused on web application security fundamentals

Offensive Cybersecurity — Online Trainee | *Cyber Forensics and Security Solutions*

May 2024 – July 2024

- Contributed to a cybersecurity project using open-source tools
- Applied offensive security techniques in a guided project setting

Bootcamp | *IBM, Karen*

- Completed structured technical training as part of an IBM bootcamp program

PROJECTS

SecureEstate — Real Estate Marketplace

- Built a Spring Boot real estate marketplace with a security- and fintech-relevant feature set
- Implemented M-Pesa escrow payments for secure transaction handling
- Built AI-based fraud detection to flag suspicious activity
- Implemented Google OAuth2 login and JWT-based authentication
- Used Redis caching and integrated email functionality

EDUCATION

Bachelor of Science in Computer Science | *Catholic University of Eastern Africa – Karen*

September 2022 – Current
